Education

2019–Present **PhD, Human Centered Computing**, *Clemson University,Clemson, South Carolina*.

2018 **BS Computer Science**, *GPA: 3.89*, *Clemson University,Clemson, South Carolina*.

Work Experience

2019–Present **Clemson University** Graduate Research Assistant, **Team Research Analytics in Computational Environments (TRACE)**. Researching how to build AI agents to interact with humans and other AI in collaborative environments.

2018 **Clemson University** Undergraduate Research Assistant, **Data Intensive Computing Ecosystems Lab**. Researched the affects of latency on high performance computing clusters in commercial cloud environments

2018 **Amazon** Software Development Engineer Intern, Financial Technology. Created and Evaluated a system for email matching payments and responses for financial collections using AWS EC2, S3, and Lambda

2017 **Clemson University** Undergraduate Teaching Assistant for Algorithms and Data Structures in C++ for **Dr. Brian Dean.** Taught labs, held office hours for undergraduate students, and helped design and proctor programming exams.

2017 **Michelin** Software Development Engineer Intern for Research and Development. Design software in C# to manage Agile Teams' members, software responsibilities, and skills.

Funding and Awards

2019 NSF **Technology-Human Integrated Knowledge Education and Research** Fellow

2019 Clemson **Three Minute Thesis** Finalist for the College of Computing, Engineering, and Applied Science

2017 DuPont Undergraduate Project of the Year: Smart Aiding Application for Travel Safety

Research Interests

Artificial Intelligence, Ethical Design of AI, Swarm Intelligence, Artificial Population Simulation, Human-AI Teamwork, AI-AI Teamwork, Collaborative Technology, Human Computer Interaction, Human Centered Design

Current Research Projects

Human Perceptions of AI Trained on Human Derived Ethical Frameworks
Collaborators: Nathan McNeese, Bekk Blando, Dylan Cathapermal, Casey Hird

- Implementing the ethical frameworks of Utilitarianism, Deontology, and Virtue Ethics in Reinforcement Learning and examining human preference towards agents built on each framework. Humans are tasked with collaborating with these AI agents to make ethical decisions. Human preference and influence of AI on human decision making will be evaluated.

Using Swarm Intelligence to Resist Attacks on Social Bias
Collaborators: Nathan McNeese
- Using large groups of shared intelligence to resist sudden shifts in bias of social platforms that can occur due to malicious attacks by people or bots. Integrating an animal behavior called "swamping" into artificial swarm intelligence to attack and resist predatory behavior.

Older Adult Opinions on the Morality of Autonomous Vehicles
Collaborators: Nathan McNeese, Julian Brinkley, Earl Huff Jr.
- Qualitative study evaluating opinions that older adults have towards the moral decisions autonomous vehicles have to make. Using focus groups to determine if older adults gravitate towards a type of ethical decision making that autonomous vehicles need to use.

Effects of Artificial Intelligence Combative Language and Behavior on Human-AI Collaboration
Collaborators: Nathan McNeese, Beau Schelble, Casey Hird
- Designing artificial agents to speak and act combative, such as being impatient and attempting to usurp another users work. Experiment seeking to observe if humans prefer a more active AI agent that can be viewed as combative or a passive agent that only responds to human commands.

Skills

Programming	Python, C#, SQL, Java, C++, R, JavaScript
Tools	Tensorflow, Tensorforce, GitHub, AWS, Node.js
Research	Quantitative Analysis, Qualitative Analysis, Focus Groups, Wizard of Oz

Relevant Coursework

- The Science of Teamwork and Technology
- Measurement and Evaluation of Human Centered Computing Systems
- Research Methods for Human Centered Computing
- Applied Data Science
- Database Management Systems

Publications

Conference Papers

[C.3] **Flathmann, C.**, McNeese, N., & Barberis Canonico, L. (Accepted). Using Human-Agent Teams to Purposefully Design Multi-Agent Systems. *2019 Annual Meeting of Human Factors and Ergonomics Society.* Seattle, WA. Sage CA: Los Angeles, CA: SAGE Publications.

[C.2] Barberis Canonico, L., McNeese, N., & **Flathmann, C.** (Accepted). Collectively Intelligent Teams: Integrating Team Cognition, Collective Intelligence, and AI for Future Teaming. *2019 Annual Meeting of Human Factors and Ergonomics Society.* Seattle, WA. Sage CA: Los Angeles, CA: SAGE Publications

[C.1] Barberis Canonico, L., McNeese, N., & **Flathmann, C.** (Accepted). The Wisdom of the Market: Using Human Factors to Design Prediction Markets for Collective Intelligence. *2019 Annual Meeting of Human Factors and Ergonomics Society.* Seattle, WA. Sage CA: Los Angeles, CA: SAGE Publications.

Research Posters

[P.2] **Flathmann, C.**, Schelble, B., & McNeese, N. (2019) Creating Human-Oriented Multi-Agent Teams. *Insights @ BMW Manufacturing Co. LLC.* 12 September 2019

[P.1] **Flathmann, C.** & McNeese, N. (2019) Using Human-Agent Teams to Purposefully Design Multi-Agent Teams. *Clemson 2019 Research Symposium* 12 April 2019

Under Review

[U.3] **Flathmann, C.** & McNeese, N. (Submitted). Enhancing the Multiple Traveling Salesman Problem from a Group Problem to a Team Problem. *Autonomous Agents and Multi-Agent Systems.*
